### **Additional statistical information on the implementation of the right to health**

- 95.5% of health facilities are functional to provide comprehensive health services, including basic and comprehensive emergency obstetric and neo-natal care.
- 1 479 out of 1 560 comprehensive HIV testing and counselling sites are in operation.
- 63.93% of children and 62.7% of adults in need of ART were receiving treatment as of December 2014.
- 78.91% of HIV positive pregnant women receive ART (2013) for Prevention of Mother to Child Transmission (PMTCT).
- All immunisations are administered free of charge to children under five years.
- Full vaccination coverage has increased from 63 percent in 2005/6 (ZDHS 2005/6) to 69.2 percent in 2014 according to the Multiple Indicator Cluster Survey (MICS) 2014.
- Shelters for pregnant women awaiting delivery, have been completed countrywide and 25 sites are being worked on. These shelters were created in order to improve institutional deliveries as well as to increase skilled attendance at birth, thereby reducing maternal morbidity and mortality.
- There were 393 444 visits for the 4<sup>th</sup> antenatal care visit in 2013 and 33 878 visits were recorded for January 2014 and 401 636 for the first ANC visit.
- The country managed to conduct three mass distributions of long-lasting insecticidal net LLINs targeting every sleeping space per household (universal access). The country has introduced routine distribution of LLINs targeting children through EPI (measles vaccine at 9 months) and primary schools (grades 3 and 6), pregnant women (at first antenatal care booking) as well as communities through the voucher system. By the end of 2014 ownership coverage of LLINs was 98% in all malaria transmission areas.
