

Introduction

1. Human rights online, especially the right to privacy, freedom of expression, opinion and the right to access information, are important issues in Namibia and must be reflected in the recommendations made during the third cycle of the UPR in April-May 2021.
2. In the second cycle of the UPR, Namibia received 218 recommendations from 88 countries, with only one referencing freedom of expression and the press.
3. The latest data from the International Telecommunications Union (ITU) indicates that as of June 2018, the percentage of individuals using the internet in Namibia is 36.8%,¹ in comparison to 14.8% in 2014.² With growing digitisation, it's even more important for UPR recommendations to explicitly reflect the need for fundamental freedoms to be protected online as well as offline, in line with Namibia's obligations under Articles 17 and 19 of the International Covenant on Civil and Political Rights (ICCPR), Article 9 of the African Charter and Article 21 of the Constitution.

Updates since the previous review

4. According to ITU data, in 2014, 35.5 in every 100 inhabitants had a mobile broadband subscription³. By 2018 (the most recent year ITU data is available for) the figure had risen to 59.3 in every 100⁴.
5. Article 21 of the Constitution of the Republic of Namibia⁵ guarantees “freedom of expression, the press and other media,” providing for legitimate restrictions under 21(2) including on grounds of “national security, public order, decency or morality, contempt of court, defamation or incitement to an offence”. For the past three years, Namibia has been the highest ranked country in Africa on the global press freedom index - with an improvement in ranking from 26th in 2018 to 23rd in 2019 and 2020 out of 180 countries assessed.⁶ The courts have also upheld freedom of expression rights as seen in the April 2019 landmark ruling which dismissed an appeal by the Namibia Central Intelligence Service (NCIS) seeking to stop the publication of an article about corruption.⁷

6. Nonetheless, other laws restrict freedom of expression in Namibia, amongst them is the Protection of Information Act 84 of 1982 and the Namibia Central Intelligence Service Act 10 of 1997 (NCISA) which have been used by authorities to silence the media.⁸ Meanwhile, in 2016, the cabinet issued a directive⁹ giving preferential treatment to state-owned media over the dissemination of government information and advertisements.¹⁰
7. State officials have frequently issued harsh criticisms¹¹ and even threats against the independence of the press¹². Freedom of expression online has not been spared with politicians threatening¹³ to gag social media¹⁴ engagements and interactions¹⁵.
8. In June 2020, the Namibia access to information bill¹⁶ was tabled before the National Assembly and is under consultation. The bill is aimed at providing for citizens' right of access to information held by public and private entities, and facilitating transparency, accountability and good governance. However, there are concerns over exemptions in the bill, including blanket confidentiality of cabinet proceedings, judicial functions and the nomination, selection and appointment of judicial officers. The proposed exemptions defeat the purpose of access to information in public interest and open justice.
9. Restrictions and exemptions to access to information have in the past been used by the government to gag and deny investigative¹⁷ journalists access to state information, on grounds of "national security"¹⁸. Sections 3 and 4 of the Protection of Information Act, 1982¹⁹ prohibits

obtaining and disclosing state information relating to, or obtained from a “prohibited place”, regarding national defense, the military, or the prevention or combating of terrorism. Non compliance is punishable by a fine not exceeding 10,000 Namibian Dollars (USD 577) or to imprisonment for a period not exceeding 10 years or both. It is on the basis of the 1983 law that the Namibia Central Intelligence Service (NCIS) went to court to stop a newspaper²⁰ from publishing information that it deemed to be endangering “national security” in 2018. The information related to misappropriation of state funds and assets by the NCIS.

10. Section 57 of the Communications Act, 2009 (Act No. 8 of 2009) provides for the establishment of a Universal Service Fund, under the implementation of Communications Regulatory Authority and funded by a levy²¹ on licensed operators’ turnover. However the fund has never become operational and in 2018, the Supreme Court ruled that collection of the levy was unconstitutional²².
11. As social media is increasingly being used to express dissent, politicians have been calling for its regulation²³ as a means of fighting misinformation and cybercrime²⁴. A proposal to regulate social media²⁵ is said to have divided members of parliament in mid-2019, however, in February 2020, the Ministry of Information and Communication Technology confirmed plans to regulate it²⁶. Such regulations, if vaguely framed and passed without stakeholder input implemented may amount to unnecessary restriction on online expression.

Freedom of Expression and Opinion

12. Although there are no reports of journalists killed, imprisoned or reported missing²⁷, harassment, assault and threats to practitioners are not uncommon. In June 2020, two journalists were

assaulted²⁸ by a Presidential Security Unit during the opening of a COVID-19 isolation facility. While the State House issued an apology²⁹, one of the journalists involved opened an assault case against the security services. During the 2019 elections, government officials launched verbal attacks³⁰ against the media. During this period the government also warned the public against bullying on social media³¹.

13. For the past few years, politicians and government officials³² have issued stern warnings³³ and threats citing the “irresponsible” use³⁴ of social media, claiming it endangers lives³⁵. In April 2020, as part of regulations to curb the spread of the COVID-19, Namibia outlawed the publication of false or misleading statements related to the virus including on social media. The offense is punishable with a fine of up to 2,000 Namibian Dollars (USD 134) or imprisonment of up to six months.³⁶A man was arrested and fined under the regulations in June 2020.³⁷
14. Following an earlier ban on government advertising in *The Namibian* newspaper in 2011, in 2016 the Cabinet announced a decision that gives preferential treatment to state-owned media³⁸ for event coverage and state advertising. Media reports hinted that this decision was designed to prioritise the allocation of government funding for the benefit of state-owned media houses.

Freedom of information and censorship of content

15. The 2019 elections were marked by tensions between politicians and the media, with President Hage Geingob citing media sabotage³⁹ in its coverage of political parties. The presidential spokesperson also alleged that the media was trying to influence elections⁴⁰ with its reporting.
16. Despite its high position in press freedom rankings, journalists in Namibia are reportedly subject to political pressure⁴¹, and pressure from employers which restricts their work in public interest. A recent incident was that of a Namibia Press Agency journalist who had a confrontational encounter with President Hage Geingob⁴² during which he freely, and with permission asked questions which were in the public interest and needed to be addressed. This resulted in a leaked communique in which the Namibia Press Agency's management distanced itself from the journalist's conduct. This case was condemned by the media and opposition political party.⁴³
17. In 2018, the NCIS filed a court cases against the Patriot Newspaper citing infringement of national security⁴⁴ and protection of the agency's information, when the newspaper planned to publish a story about land deals involving former NCIS members. The NCIS based its case on the 1982 Protection of Information Act. This attempt to gag the media attracted fierce condemnation⁴⁵ from civil society organisations and the wider public. Courts dismissed the case in April 2019.

Right to Equal Access and Opportunity

18. Namibia has one of the highest rates of income inequality in the world⁴⁶. The technology sector is hindered by a lack of affordable access, and poor quality service⁴⁷. The 2020 Inclusive Internet

Index, which assesses internet availability, affordability, relevance of content and readiness ranks Namibia 84th out of 100 countries, while the ITU's 2017 ICT Development Index ranked it 118th out of 176 countries assessed.⁴⁸ A National Broadband Policy (2020)⁴⁹ was recently launched with the aim of achieving reliable and affordable broadband access services for all. While the policy lacks precision with regard to target groups or regions, its five-year implementation action plan seeks to ensure 95% broadband coverage by 2024 as well as operationalise the Universal Access and Service Fund.⁵⁰

19. The 2020 Women's Rights Online Report Card on Namibia⁵¹ scores the country 29% based on assessment of internet access and women's empowerment; relevance of content and services; online safety; affordability; and digital skills and education. The report card indicates that only 47% of Namibian women have access to the internet and that there is no national policy recognising technology as a tool for fighting gender inequalities. On affordability, the report found that 1GB of data costs over 8% of average monthly income⁵², leaving it out of reach for many Namibians.

Right to data protection and privacy on the internet

20. The right to privacy is provided for under Article 13 of the Namibian Constitution⁵³, which states "No persons shall be subject to interference with the privacy of their homes, correspondence or communications save as in accordance with law and as is necessary in a democratic society in the interests of national security, public safety or the economic well-being of the country, for the protection of health or morals, for the prevention of disorder or crime or for the protection of the rights or freedoms of others".
21. Namibia does not have a data protection and privacy law. However, there are some indications of progress. In February 2020, a multi-stakeholder consultation⁵⁴ on the data protection bill was hosted, reportedly engaging with 85 participants including representatives from the offices of the President, Vice-President, and Prime Minister; Parliament; the Ministry of ICT; criminal justice authorities; ministries of education, gender equality and child welfare; ministries of agriculture and land reform; internet and telecommunications service providers as well as civil society groups. In the absence of a data protection law, incidents of data breaches have been reported

from the corporate⁵⁵ to the individual level. Further stakeholder consultations on the Bill were conducted between September to mid-October via online platforms by the Ministry of ICT with the support from the Council of Europe.

22. In 2017, the Communications Regulatory Authority of Namibia (CRAN) enforced a provision within the Communications Act requiring mandatory SIM card registration⁵⁶ through telecommunications operators. The registration exercise was later abandoned as civil society and media raised concerns⁵⁷. There are reports that SIM card regulations are under review as part of the ongoing review⁵⁸ of the Communications Act.

23. Part 6 of the 2009 Communications Act⁵⁹ provides for interception of communications by establishing an interception centre for the purposes of combating crime and national security. Article 70, (8) reads: “Where any law authorises any person or institution to intercept or monitor electronic communications or to perform similar activities, that person or institution may forward a request together with any warrant that may be required under the law in question to the head of an interception centre.” The Act further empowers staff members of the interception centre to “do anything necessary in order to perform the interception or monitoring concerned (as well as any decoding or decryption necessary to make the information in question intelligible).”

24. In June 2019, the Ministry of Information and Communications Technology tabled⁶⁰ the Electronic Transaction Bill before the National Assembly. When it was first published in 2017 as the Electronic Transactions and Cybercrime Bill, civil society raised concerns stating that various sections provided for “warrantless search and seizure operations”, while other sections allowed for “a system of secret warrants and unauthorised access by state agents”.⁶¹ The Bill was later split, with the Electronic Transaction Act being passed by parliament⁶² but pending ministerial gazette. The Act empowers law enforcement officials to conduct interception and surveillance of communications as part of their investigations (Chapter 8), with the assistance of telecommunications companies and internet service providers.

25. There is a high perception of state sponsored surveillance among civil society and the media, particularly by the Central Intelligence Service⁶³ as reported by *The Namibian* newspaper in a detailed three-edition report.^{64 65 66} Civil society and the media believe that the state, particularly the Central Intelligence Service, is highly engaged in arbitrary interception and surveillance of citizens, in disregard of their privacy rights.
26. On the other hand, online violence against women remains a challenge.⁶⁷ A report by the World Web Foundation⁶⁸ revealed that the lack of cybercrime and data protection legislation in Namibia puts women at risk of violence, and in vulnerable positions in the cases of non-consensual image sharing (also known as revenge pornography), as well as with regard to online blackmail and sexualised hate speech.
27. Namibia is referred to as “a safe haven for cybercrime”⁶⁹ and without a cybercrime law⁷⁰, many citizens have fallen victim to online fraud⁷¹ One the other hand, data protection remains a

concern⁷².

Proposed Recommendations

- 28.** In light of Namibia’s existing record on freedom of opinion and expression, freedom of the press, and the right to privacy online, the submitting organisations call on states to propose the following recommendations to Namibia:
- a.** Amend Article 21 of the Namibian Constitution to remove restrictions on freedom of expression on the undefined grounds of “decency or morality” “defamation” or “incitement.” and desist from criticism and harassment of journalists and the media.
 - b.** Repeal the Protection of Information Act no. 84 of 1982, especially in light of the Access to Information Bill.
 - c.** Amend the Namibia Central Intelligence Services Act 10, 1997, by repealing section 4 which blanketly prohibits persons from accessing information on grounds of “national security”.
 - d.** Amend Part 6 of the Communications Act, by repealing section 9, and criminalizing unauthorized interceptions and surveillance of citizens.
 - e.** Operationalise the Universal Service Fund and the National Broadband Policy (2020) to promote affordable, equal and equitable access to the internet and related technologies among women and underserved communities.
 - f.** Enact Cybercrime, Data Protection and Privacy legislation in compliance with Article 21 of the Constitution and international human rights standards and obligations.
